

JAH-003-1033003

Seat No. _____

B. C. A. (Sem. III) (CBCS) Examination

November - 2019

CS-15 : RDBMS Using Oracle

Faculty Code : 003

Subject Code : 1033003

Time : $2\frac{1}{2}$ Hours]

[Total Marks : 70

1 (a) Attempt the following objective questions : 4

A ROW data type is a complex data type that can store multiple data values within its ordered set of one or more fields.

- (1) Raw types are used to store which type of data ?
- (2) A table cannot have one more than one Long data type. (True / False)
- (3) _____ removes all the rows from table, but its structure and constraints and so on, remains.
- (4) In SQL, which command is used to select only one copy of each set of duplicate rows ?

(b) Attempt any one : 2

- (1) Write a note on E-R Diagram.
- (2) Differentiate: DBMS v/s RDBMS.

(c) Attempt any one : 3

- (1) Explain various components of SQL.
- (2) What are E-F Codd rules? Explain.

(d) Attempt any one : 5

- (1) List out various operators and explain any 2 operators with example.
- (2) Explain various data types available in SQL.

- 2 (a) Attempt the following objective questions : 4
- (1) _____ clause acts like a where clause but is used for groups rather than rows.
 - (2) The condition in a where clause can refer to only one value. (True / False)
 - (3) Drop table cannot be used to drop a table referenced by a _____ constraints.
 - (4) The statement in SQL which allows changing the definition of a table is _____.
- (b) Attempt any **one** : 2
- (1) Explain group by and having clause with suitable example.
 - (2) Write a note on set operators.
- (c) Attempt any **one** : 3
- (1) What is join ? Explain its various types.
 - (2) What are constraints ? Explain any two constraints with suitable example.
- (d) Attempt any **one** : 5
- (1) Consider these following tables and only solve the query.
 Tables : (1) student : s_id (Primary key), sname, city
 (2) result: r_id (Primary Key), mark1, mark2, s_id (Foreign key)
 Query :-
 – Write a SQL statement to make a list with r_id, s_id, student name and mark1 for those whose marks between 70 and 90.
 – Find out maximum mark2 from result table.
 - (2) Table : Employee : Emp_no (primary key), emp_name, city, mgr_no, job, sal, dept_no
 – Display department wise average salary.

- 3 (a) Attempt the following objective questions : 4
- (1) A view is a virtual table that can be accessed via SQL commands. (~~True~~ / False)
 - (2) In a _____ two database operations wait for each other to release a lock.
 - (3) Oracle uses a method called _____ to implement concurrency control.
 - (4) Indexes may be created or dropped at any time. (~~True~~ / False)
- (b) Attempt any **one** : 2
- (1) Differentiate: pessimistic lock v/s optimistic lock.
 - (2) Define the term: cluster, synonym.
- (c) Attempt any **one** : 3
- (1) What is view ? Explain in detail.
 - (2) Write a note on indexes.
- (d) Attempt any **one** : 5
- (1) Write a note on sequence.
 - (2) What are locks ? Explain its various types.
- 4 (a) Attempt the following objective questions : 4
- (1) A cursor is a database object which is used to manipulate data in a row-to-row manner.
 - (2) If user defined error condition exists, the call to the user defined exception is made using a raise statement.
 - (3) Which is a database object that allows us to execute a batch of SQL code when a table event occurs ? -trigger
 - (4) type data type is also known as user defined data type.

- (b) Attempt any **one** : 2
- (1) Differentiate: %type v/s %rowtype.
 - (2) Define the term: varrays, nested table.
- (c) Attempt any **one** : 3
- (1) What is cursor ? Explain its various types.
 - (2) What is exception ? Differentiate: predefined v/s user defined.
- (d) Attempt any **one** : 5
- (1) What is procedure ? Explain with example.
 - (2) Consider a student table having fields like seat_no, name, and mark. Develop a trigger on the table for insert or update any records and name should be display into the uppercase.
-
- 5 (a) Attempt the following objective questions : 4
- (1) _____ file holds the actual data.
 - (2) A tablespace is used to logically group data together.
 - (3) LGWR stands for _____.
 - (4) the job is a principal scheduler object.
- (b) Attempt any **one** : 2
- (1) Differentiate: Data files v/s Redo log files.
 - (2) Define the term: oracle blocks, import.
- (c) Attempt any **one** : 3
- (1) Write a note on initialization parameter.
 - (2) What is memory structure ? Explain in detail.
- (d) Attempt any **one** : 5
- (1) Write a note on scheduler.
 - (2) What is instance architecture ? Explain.
